#### BIG MINERS STRIKE IS AVERTED

Kansas City, Aug. 19.—Danger of a strike of coal miners in Kansas, Missouri, Oklahoma and Arkansas has been averted.

This was announced today by members of the sub-committee of miners and operators who are considering a contract for the ensuing year. Agreement has been reached on the six disputed clauses. The sub-committee will so report to the general conference committee Monday.

While the terms were not made public, it was stated that both miners and operators conceded points. By the settlement, 35,000 men will continue to work. It also means higher prices for coal, according to operators.
